Warning!

Ensure the wiring maintains the correct polarity at all times.

Incorrect wiring of the LED module will cause serious damage and will invalidate the warranty.

Alpha LED should be connected to its driver according to the following SELV standard.

Red = Positive / Black = Negative

Warning!

The Alpha LED module is not serviceable.

Tampering will cause serious damage to the LED module and will invalidate the warranty.

Warning!

The Alpha LED driver is fitted with an internal operating current selector switch.

Running the luminaire above the designed output will cause serious damage to the LED and invalidate the warranty.
